

## Some getting-started resources for humanities scholars new to project management

Forewarned is Forearmed. And you're going to need four arms.

Sharon M. Leon, "[Project Management for Humanists: Preparing Future Primary Investigators](#)" in [#Alt-Academy](#) (Nowviskie, ed.). MediaCommons, 2011.

Other #Alt-Academy essays provide helpful context, too.

[Digital Humanities Questions and Answers](#), a friendly, open Q&A forum hosted by the Association for Computers and the Humanities, in collaboration with ProfHacker. Ask your questions here, follow [@DHanswers](#) on Twitter, and see past posts, such as: [Does DH Project Management Differ from Non-DH Project Management?](#); [Best DH Project Management System?](#); and [What Does It Mean to Future-Proof a DH Project?](#)

[Collaboratively-edited notes](#) from Tom Scheinfeldt's THATCamp session on project management. 3 June 2011. These are largely about grant-seeking and management of big, funded projects, but there's useful stuff here for beginning DHers, too. Attending any local [THATCamp](#) is a great idea as well.

Brian Croxall, "[12 Basic Principles of Project Management.](#)" ProfHacker, 3 March 2011.

Bre Pettis and Kio Stark, "[Cult of Done Manifesto.](#)" 2009. (I like [this poster version](#). The point here is to remind yourself that you're not about nuance, ambiguity, and refinement in this role.)

Science Magazine's how-to series on "[How to Manage a Lab and Staff.](#)" See especially Robert Austin's 2006 article on [managing knowledge workers](#).

Wikipedia's [comparison chart](#) of project management software. (But don't get too hung up on this. Common-sense practices, scaled to your needs are more important than any packaged system. Get a feel for your project first.)
